

Dear Parents, Caregivers and Friends of our School,

Today Wade Construction have made a start on the preparations for the building. Safety fences have been erected and the small storage shed has been removed.

In a short space of time the trees marked in the map will be removed. Reasons for this are;

We need to get light into the new building and along the back where we plan the garden to table project

Silver Birches of this size and prone to losing branches in strong winds and are causing some alarm to the people parking underneath them.

Their leaves fill the building gutters in autumn

Pollen from silver birches are known to cause respiratory issues

We do plan to plant trees more suitable for our environment as part of our project.

Kind Regards

Cushla
